.

PDF

Container layout on survey 1318, drawn to the survey's graphic scale (1″ = 8′). Each mark measures ≈8 ft wide × 31–33 ft long. A 20 ft container fits inside either mark. A 40 ft container runs past both ends of each mark. At B it also reaches the east lot line by the trash enclosure.

RED MARK	POSITION ON SURVEY	SIDE OF STRUCTURE SETBACK LINE	OVERLAPS
North	Between the building's north wall and the 5′ non-exclusive roadway & utility easement (Radford 2854 OR 76)	Building side	Rear parking area
East	East lot line, beside the trash enclosure	Creek side, at projected top of creek bank	5 parking spots

SURVEY DATA	VALUE
Lot area	20,169 sf excluding the dedication
Easements	Per Old Republic Title prelim. report 0147012515; 5′ roadway & utility easements on north side; creek watercourse easement
Spot elevations near the marks	≈45.1–47.5 ft (assumed datum)

3D scan of building and lot edges: Matterport tour

Hamed's container research (2023–2025)

DATE	WHO	WHAT WAS SAID
2023-05-15	Hamed	Marked two container locations on survey 1318 ("Container Location")
2023-09-05	Hamed → Curt	"If I have a storage container on site (like a 20ft shipping container), would inventory stored in the storage container be covered by our insurance (ie against theft)?"
2023-09-06	Curt	"It would need a good layer of Security… Unless there's a 3rd party security cameras or a 3rd party central alarm on the container theft would not be covered."
2023-09-06	Hamed → Curt	"If I added a third party monitored door sensor and motion sensor, which is tied into the central alarm system, it's covered?" Curt: "Yes, that is correct."
2023-09-06	Curt	"I would put some barriers that would slow down the removal of the inventory if they breach the lock."
2023-09-22	Underwriter (via Curt)	Concern: rug values and stacking "causing a high fire load"; no sprinkler or fire alarm shown on the Acord.
2023-09-22	Hamed	Rugs are handspun wool (little silk), flame-retardant (IWTO data, below); avg cost $1,900; imported; stacked on the ground; 3rd-party monitored fire alarm; no sprinklers; hydrants along Main St.
2023-10-16	Curt	Alternative quote came back higher; renewal stays with Scottsdale, moved to Coastal Underwriters (broker-of-record letter).

Vendor quotes below were forwarded by Hamed on 19 Oct 2026. No city container rules were found in email.

Standard container sizes

SIZE	OUTSIDE L × W × H	INSIDE L × W × H	DOOR OPENING W × H	FLOOR OUT / IN	VOLUME	TRUCK RUN	SOURCE
10 ft	10′ × 8′ × 8′6″	9′3″ × 7′8″ × 7′10″	7′8″ × 7′6″	80 / ≈71 sf	556 cu ft	≈50 ft	Conterm · XCaliber
20 ft standard	20′ × 8′ × 8′6″	19′4″ × 7′8″ × 7′10″	7′8″ × 7′6″	160 / ≈148 sf	1,169 cu ft	65–75 ft	R172 · quotes above
20 ft high cube	20′ × 8′ × 9′6″	19′4″ × 7′8″ × 8′10″	7′8″ × ≈8′5″	160 / ≈148 sf	1,316 cu ft	65–75 ft	Mobile Modular
40 ft standard	40′ × 8′ × 8′6″	39′6″ × 7′8″ × 7′10″	7′8″ × 7′6″	320 / ≈303 sf	2,387 cu ft	120 ft	R173 · R134
40 ft high cube	40′ × 8′ × 9′6″	39′6″ × 7′8″ × 8′10″	7′8″ × 8′6″	320 / ≈300 sf	2,694 cu ft	120 ft	R174 · R175

All sizes are 8 ft wide outside. Every size is over the 120 sf no-permit limit except the 10 ft. Inside sizes vary by about 1″ between manufacturers. A standard parking spot is 8.5 × 18 ft.

Wool & Fire Facts

Research indicates that wool used in apparel and furnishing textiles can provide a greater level of fire safety than other fibres:

- Wool is difficult to ignite (570-600 °C) compared to Cotton (255 °C) or Polyester (485-560°C)
- Wool does not melt, unlike polyester and nylon, which melt at 252-292°C and 160-260°C respectively
- Wool – even when warm – does not stick to the skin
- Wool has a low heat combustion level, meaning the amount of heat released in burning
- Wool does not produce toxic fumes when exposed to high temperatures

Table: Key measures of flammability for common textile fibres

Fibre	Limiting Oxygen Index (%)	Heat of combustion (Kcal/g)	Ignition temp (°C)	Melting temp (°C)
Wool	25.2	4.9	570-600	Does not melt
Cotton	18.4	3.9	255	Does not melt
Nylon	20.1	7.9	485-575	160-260
Polyester	20.6	5.7	485-560	252-292
Rayon	19.7	3.9	420	Does not melt

Wool fire facts sent to the underwriter, 22 Sep 2023 (source: IWTO, PDF).

Installation — web research

From public web sources (city code, fire code, vendors, conservators), not from the emails. Click a row ID for the full quote. Nothing here is a city ruling: the zoning question goes to the Duty Planner.

ITEM	VALUE	DETAIL	SOURCE
City rules	Outdoor storage prohibited except listed uses (WCMC 10-2.3.121.B)	Walnut Creek bans outdoor storage in every zone except a short list of uses, and general retail inventory storage is not on that list.	Article 1: Site Regulations R003
	—	Unverified: I found no Walnut Creek provision that names cargo, shipping or portable storage containers; ask the Duty Planner whether a 20/40-ft container in C-R is an accessory structure (design review plus building permit) or barred outdoor storage under 10-2.3.121, and whether any temporary allowance exists.	Design Review R011
	New structure ≤500 sf = minor project	Placing a container (a structure) needs design review; a new structure of 500 sf or less is a minor project.	Article 12: Design Review R010
	120 sf max (CBC 105.2 item 1)	The CBC permit exemption covers only one-story detached storage sheds up to 120 sf; a 20-ft (about 160 sf) or 40-ft (about 320 sf) container is larger than that.	Chapter 1 Scope and Administration R013
	>120 sf = building permit	The City's own guidance: accessory structures of 120 sf or less need no permit, and anything over 120 sf needs a building permit.	Accessory Structures in Resident… R017

ITEM	VALUE	DETAIL	SOURCE
	Temporary structures ≤180 days	Temporary structure permits are time-limited and capped at 180 days unless the building official grants an extension.	Chapter 1 Scope and Administration R014
Placement on lot	WCMC 10-2.3.116	Non-residential lot areas used to store equipment or materials must be paved and kept orderly.	Article 1: Site Regulations R009
	Retention of Existing Parking	Existing parking cannot be reduced below the required number, and existing deficient parking cannot be reduced further, so containers cannot take required parking spots.	Article 2: Off-Street Parking, L... R022
	WCMC 10-2.4.1202	Substantially altering a parking layout or its dimensions, such as removing parking spots for containers, needs design review approval.	Article 12: Design Review R026
	CFC 503.4	Fire access roads may not be obstructed in any way, so containers cannot sit in a required fire lane.	Chapter 5 Fire Service Features R039
	10 ft from lot line (3 ft if ≤6 ft high)	Outside combustible storage must be at least 10 ft from a lot line, or 3 ft if no higher than 6 ft, unless the fire code official approves less.	Chapter 3 General Requirements R041
	—	Unverified: I found no Walnut Creek code section adopting the CCCFCD 30-ft structure setback or a projected top-of-bank method for this parcel; ask Walnut Creek Engineering and CCCFCD for the setback line here and whether an unanchored container counts as a structure. County guidance says sheds closer than 10 ft to top of bank should be anchored.	Maintenance of Creeks on Private... R037
Delivery	75 ft (20ft) / 120 ft (40ft); 16 ft high tipped; 12 ft width	Western Container Sales needs 75 ft of straight clearance to deliver a 20ft container and 120 ft for a 40ft, with up to 16 ft of overhead clearance while the truck is tipped.	Western Container Sales – Delivery R134
	70 ft (20ft) / 120 ft (40ft), 10 ft wide, 16 ft high	Dry Box says the delivery spot should be solid, smooth and level, preferably on gravel, with 70 ft of straight clearance for a 20ft and 120 ft for a 40ft.	Dry Box – Storage Containers for... R171
	4–7 business days (buy); 2–5 business days (rent)	Western Container Sales gives typical delivery windows of 4 to 7 business days for purchases and 2 to 5 business days for rentals.	Western Container Sales – Oaklan... R135
Ground + anchoring	$300–$900 (20ft); $600–$1,800 (40ft); $1,200–$3,000 hired	A container vendor's 2026 guide estimates a DIY gravel pad at $300 to $900 for a 20ft and $600 to $1,800 for a 40ft, or $1,200 to $3,000 if hired out.	AM Shipping Containers – Shippin... R167
	$199.95 (4 PK)	Container Modification World sells a 4-pack of container shoes (corner footings) for $199.95.	Container Modification World R170
	—	Ground anchors (dovetail locks or foundation plates) fix containers to concrete or asphalt, which resists both wind displacement and theft.	Shipping Container Twist Locks &... R096
Climate inside	—	Condensation ('container rain') forms inside a closed steel container when the roof or walls cool below the dew point of the air inside, even if the container is weather-tight.	Container Rain Explained R098
	—	For a stationary container with power, the recommended approach is a dehumidifier drained regularly, plus desiccants for the moisture that builds up between cycles.	How To Stop Condensation In Ship... R100

ITEM	VALUE	DETAIL	SOURCE
	20ft: 1 intake + 1 exhaust	For a 20 ft storage container, use one low louvered intake and one high louvered or solar exhaust at the opposite end; for a 40 ft, a solar roof exhaust plus one or two low intakes.	How Many Vents Does a Shipping C… R102
	70% RH ~100 days; 80% RH ~10 days	The Canadian Conservation Institute says that at 25°C, 70% RH brings a risk of mould in about 100 days and 80% RH in about 10 days, so RH should stay well below 65%.	Caring for textiles and costumes… R104
	55–70°F; 40–55% RH	One rug retailer recommends storing at 55 to 70°F and 40% to 55% relative humidity, somewhere dark and well ventilated.	How to Store Rugs Properly R111
Rug handling	—	The Textile Museum advises rolling rugs with the pile inside and in the direction of the pile, to avoid abrading the pile or stressing the knots.	Storing Textiles R107
	1.5 wraps	Wrapping a rolled rug in muslin or cotton sheeting, at least one and a half turns, gives a breathable barrier against dust and light.	Storing Textiles R108
	—	Rug dealer guidance is to wrap in breathable material such as Tyvek, cotton or paper, never plastic, add a moth deterrent, and keep the rug off the floor.	How to Store a Rug (and Keep Mot… R110
Locks + alarm	$129.95	The DoorGuard container lock box with lock costs $129.95 and is designed so the lock is not exposed, unlike a puck lock hasp.	DoorGuard Lock Box for Shipping… R095
	$145.99	USA Containers lists a heavy-duty container door bar lock system at $145.99, alongside puck lock boxes.	Shipping Container Locks & Lock… R093
	battery life >1 year	The Mobeye container alarm is a battery-powered, stand-alone unit with a PIR motion sensor and an external cellular antenna; it can send alerts to a private monitoring centre and its batteries last over a year.	Container alarm – Mobeye R086
	—	Self-contained cellular container alarms can route alerts to a professional alarm receiving centre (ARC), which is what the insurer's central-station requirement calls for.	Container alarm – Mobeye R087
